# Mixing Base

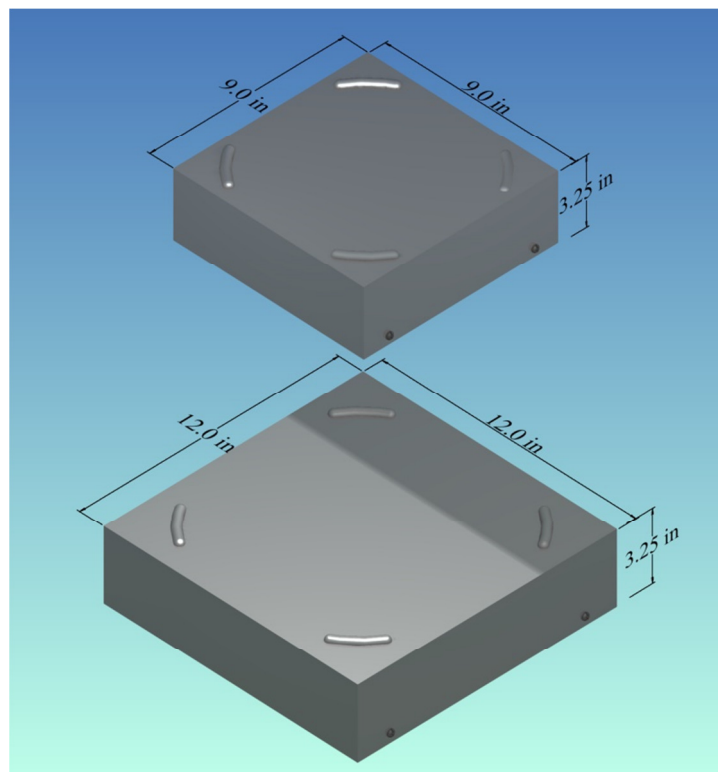

- Works on most tanks.
- No moving parts.
- Won't clog or leak.
- Four can fit in a keg box.
- Uses a single outlet.
- Low power consumption.
- Easy installation.

This new patent pending technology mixing base will turn almost any ordinary pre-mix tank into a mixing tank that will prevent just about any recipe from separating and settling. The electronic controller spins a magnetic stir bar that is dropped into the tank. There are no moving parts contained within the water tight base. It is completely electronic so there are no parts to wear out, pumps to clog, seals to leak, nothing to maintain. The power supply uses a single outlet and provides low voltage 12 volts to the bases. If there is no power in the cooler a power extension is available to route the low voltage line outside the cooler to the nearest power available. Expand the number of bases up to four using the power splitter.

Sediment, Pulp & seeds are not a problem for this mixer so now you can get more creative with your beverage recipes.

# Mixing Base

Two styles bases come in 9" and 12" configurations to accommodate 3 gallon, 5 gallon, 10 gallon and 15 gallon tanks. With the bases only 3.25" tall, four 9" bases will easily fit into a 24" keg box with a single low voltage wire exiting the cooler. Guides on top of the base help center and stabilize the tanks. Any combination of small or large bases can be used with a multi-base system using the Power Splitter.

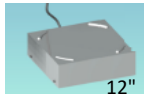

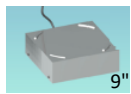

- Small Base - 9" w x 9" d x 3.25" tall
- Large Base - 12" w x 12" d x 3.25" tall
- Single Base Power – 120vac @ 1a
- Splitter Power Supply – 120vac @ 1.5a
- 18 ga 304 Stainless St
- Water tight power connectors
- Low voltage and only 9 watts.
- Easy installation.
- Warranty 1 year parts and labor – return the Crysalli for repair or replacement.

## Accessories

- Power Splitter to expand up to four bases
- Low Voltage Power Extension
- Product tanks available from 3 to 15 gallons

## Components

**CMBS-950-709** Mixing Base, 9". Less power supply and spin bar

**CMBS-950-712** Mixing Base, 12". Less power supply and spin bar

**CMBS-950-705** Power Supply, 12vdc 2a, use with one mixing base

**CMBS-950-706** Power Supply, 12vdc 6a, use with Splitter

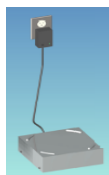

**CMBS-950-707** Power Splitter to connect up to 4 bases, use with 6a Power Supply

**CMBS-950-708** Power Extension Cord, 12'

**CMBS-950-710** Spin Bar Magnet 2". Use at least one per Pre-Mix Keg

## Systems

9" Base Kit 12" Base Kit

**CMBS-950-701** 9" Single Base System Kit, includes: a 9" base, 2amp power supply and spin bar.

**CMBS-950-702** 12" Single Base System Kit, includes: a 12" base, 2amp power supply and spin bar.

## Multi-Base Systems

For multi base systems start with the 6a power supply and splitter. Then add any combination of the 9" or 12" bases as needed and a spin bar for each base for up to a total of 4.
