

# ProFusion iN2 Cleaning Instructions

## DAILY Cleaning & Sanitizing Instructions:

1. Mix Clearly Cold™ cleaning solution in a spray bottle
2. Dilution 7.5mL (0.25 oz.) per gallon of water
3. Remove faucet nozzles and spray inside and out with Clearly Cold™ cleaning solution and rinse with water
4. Spray and wipe the exterior of tower or faucet plate, faucets and drip pan with Clearly Cold™ cleaning solution and wipe clean with warm water
5. Visually check clear bowl of particulate filter (A plugged filter screen will reduce or stop product from flowing out faucets)
  - a. The filter is located beneath the CR-1-iN2-2P counter top system. Remove drip pan and line set cover to access
6. If the particulate filter is clogged, disconnect keg coupler from the keg/tank and open faucet(s) to relieve pressure from system
7. If the particulate filter is not clogged, skip to step 9
8. Unscrew clear bowl of the particulate filter and pull the round filter screen out. Wipe down inside of the filter assembly.
9. Spray the filter screen and clear bowl with Clearly Cold™ cleaning solution and rinse with water (be careful not to lose the o-ring)
10. Insert the filter screen back into the filter housing and screw on the clear bowl and tighten firmly by hand
11. Mix Complete Cafe™ sanitizer solution in a spray bottle
12. Dilution 7.5mL (0.25 oz.) per gallon of water
13. Spray inside and out of the nozzles with Complete Cafe™ sanitizer solution and allow to air dry
14. Spray and wipe the exterior of tower or faucet plate, faucets and drip pan with Complete Cafe™ sanitizer solution and allow to air dry
15. Install Nozzles on faucets tightening by hand
16. Check the pressure of the nitrogen tank at primary regulator. Make sure tank is not low.
17. Check the connections at the keg/tank to assure couplers are properly engaged on tank
18. Twice a week or when the keg/tank is emptied, it is recommended that the entire dispense system is cleaned and sanitized (See recommended bi-weekly system cleaning and sanitizing below)

## Recommended Bi-weekly Cleaning & Sanitizing Instructions:

1. Complete daily cleaning and sanitizing process
2. Mix Clearly Cold™ cleaning solution in vessel to be cleaned
  - a. Dilution 30mL (1 oz.) per 4 gallons of water
3. Soak for 15 minutes
4. Flush the cleaning solution through the lines (including the iN2 Injector system)
5. Run ½ of the cleaning solution the cold brew tap and the other ½ through the nitro brew tap
6. Empty the excessive cleaning solution from the vessel and rinse with clean water
7. Fill the vessel with clean water
8. Thoroughly flush the water through the lines (including the iN2 Injector system)
9. Complete the sanitizing step using Complete Cafe™ sanitizer
10. Mix Complete Cafe™ sanitizer in a vessel which has been cleaned with Clearly Cold™ cleaning solution
  - a. **IMPORTANT:** First fill vessel with water, then add Complete Cafe™ sanitizer
11. Allow Complete Cafe™ sanitizer solution to remain in vessel for 1 minute
12. Flush the Complete Cafe™ sanitizer solution through the lines (including the iN2 Injector system)
13. Run ½ of the sanitizer solution the cold brew tap and the other ½ through the nitro brew tap
14. Do not rinse.
15. Tap you fresh keg and dispense purging any air and sanitizer out of the system.
